

GNAHOUA ZOABLI

PROFILE

I have been an experienced manager in biomedical engineering since 1995, and in the Quebec network for more than 20 years. In my management experiences, I am mainly committed to the safety of the medical act, not only for the benefit of the patient, but also for the doctor, the staff and the visitor of the health and social services network, to whom it is necessary to avoid becoming the next patient.

In my experience in health and social services in Quebec and Canada, in addition to the safety of the medical act, I also have at heart the quality of services, innovation, multidisciplinary work, well-being and development of the people with whom I work, for the effective and efficient use of public resources.

I am skilled in assessing trends and complex management issues and in bringing out concrete solutions adapted to the needs of different actors. I am known for my engaging and collaborative leadership style and my results-oriented approach.

My professional influence extends to Quebec and Canada. I am well integrated in my community in the Laurentians, where I am committed to promoting social causes within local and regional organizations.

By overseeing an important grouped call for tender's dossier for Quebec Provincial Procurement Agencies, I demonstrated my capacity to creatively mobilize experts who initially had different visions that were difficult to reconcile.

I have contributed a lot in my experience to the re-engineering of the increase of critical services while combining efficiency and economy.

My contribution is recognized in the field of health as a manager visionary and lucid enough to prevent problems; skilled in apprehending and communicating complex issues.

HOBBIES

Board games
Cinema
Fishing
Walking in the woods

EDUCATION

UQAM & Paris-Dauphine University
Fall 2018 - Summer 2020
Executive MBA (dual degree)

University of Montréal
Winter 2000 - Summer 2006
PhD in Biomedical Engineering

CAREER

CISSS des Laurentides - Chief of the Biomedical Engineering Department – Medical Equipment, Capital Component.
November 2, 2009 - ongoing

Santa Cabrini Opedale Hospital in Montreal - Chief of Biomedical Engineering
May 12, 2003 – December 12, 2009

Sir Mortimer B. Davis Jewish General Hospital – Interim to fill the departure of the Chief of Biomedical Engineering and a Biomedical Engineer
September 2000 to July 2001

Medical technical equipment (EEM. CI) Abidjan – Chief of biomedical engineering department
August 1995 – December 1997

TEACHING

Polytechnique Montréal – Biomedical Engineering program
Winter 2004 – Winter 2012

Polytechnique Montréal - Supervision of undergraduate trainees in biomedical engineering
Since summer 2009

University of Montréal – Clinical Biomedical Engineering (M. Eng.) – Telehealth.
Since autumn 2013

University of Montréal - Supervision of trainees in clinical biomedical engineering (M. Eng.)
Since autumn 2012.

Institute of Health Engineers (ISIS) – Full Professor in Biomedical Engineering - Instrumentation. Medical imaging.
Since winter 2021

SKILLS

Operations Management (Green Belt equivalent)
Human Resources Management
Strategic Planning
Biomedical Engineering
Corporate strategy.
